CaptivatingVon Dina DajaniA friend recommended I read Dune Messiah and I bought Dune by mistake. It was a wise decision as I was captivated and eager to continue in the series..0 von 0 Kunden fanden die folgende Rezension hilfreich. Read the book!Von Hillary SangIt took me a few pages to get into the storyline because of the new names and concepts but once i got familiar it was a very good read!1 von 2 Kunden fanden die folgende Rezension hilfreich. Leseempfehlung, nicht nur fr Science-Fiction-FansVon BuecheroeliNach einer Diskussion auf einer Party mit zwei Science-Fiction Fans kurz vor den Ferien kam mir Dune wieder in den Sinn, wahrscheinlich (Douglas Adams einmal beiseite) den einzigen Science-Fiction Roman, den ich mich erinnere vor langer Zeit einmal gelesen zu haben. Ich konnte mich auch dank des Films mit Sting recht gut an die Geschichte erinnern (nach einigen wenigen Seiten fiel mir der Name des Verrters wieder ein), aber das war wider Erwarten unproblematisch, da es keinen richtigen Spannungsbogen gibt. Wir folgen einer Geschichte von der wir das Ende kennen da jedem Kapitel ein Rckblick auf das Leben des Paul Muad'Did vorangestellt ist. Was den Reiz des Buches ausmacht ist der Blick in die von Herbert kreierten Welt mit einer Mischung aus antiken, mittelalterlichen und frh neuzeitlichen Elementen. Trotz diesem Mischmasch von Gladiatorenkmpfen, Feudalismus, Atombomben, Orient und kaltem Krieg ist diese Welt in sich stimmig und interessant und man kann sich sogar einige Gedanken mit in die unsrige nehmen. Sprachlich ist das Buch (im Original) wirklich gut.

KurzbeschreibungFrank Herberts epic masterpiecea triumph of the imagination and the bestselling science fiction novel of all time.Set on the desert planet Arrakis, Dune is the story of the boy Paul Atrides, who would become the mysterious man known as Muad'Dib. He would avenge the traitorous plot against his noble familyand would bring to fruition humankind's most ancient and unattainable dream.A stunning blend of adventure and mysticism, environmentalism and politics,Dune won the first Nebula Award, shared the Hugo Award, and formed the basis of what it undoubtedly the grandest epic in science fiction..deThis Hugo and Nebula Award winner tells the sweeping tale of a desert planet called Arrakis, the focus of an intricate power struggle in a byzantine interstellar empire. Arrakis is the sole source of Melange, the "spice of spices." Melange is necessary for interstellar travel and grants psychic powers and longevity, so whoever controls it wields great influence. The troubles begin when stewardship of Arrakis is transferred by the Emperor from the Harkonnen Noble House to House Atrides. The Harkonnens don't want to give up their privilege, though, and through sabotage and treachery they cast young Duke Paul Atrides out into the planet's harsh environment to die. There he falls in with the Fremen, a tribe of desert dwellers who become the basis of the army with which he will reclaim what's rightfully his. Paul Atrides, though, is far more than just a usurped duke. He might be the end product of a very long-term genetic experiment designed to breed a super human; he might be a messiah. His struggle is at the center of a nexus of powerful people and events, and the repercussions will be felt throughout the Imperium. Dune is one of the most famous science fiction novels ever written, and deservedly so. The setting is elaborate and ornate, the plot labyrinthine, the adventures exciting. Five sequels follow. --Brooks Peck.co.ukThis Hugo and Nebula Award winner tells the sweeping tale of a desert planet called Arrakis, the focus of an intricate power struggle in a byzantine interstellar empire.
