Von Dale Brown : Fatal Terrain (Patrick McLanahan Book 6) (English Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Fatal Terrain (Patrick McLanahan Book 6) (English Edition):

However, this particular book does a credible job spinning a story around a resurrected B-52 fleet. Joseph Campanella's voice characterizations are quite good and easily recognizable allowing the listener to keep the many characters straight while concentrating on the story line.

The audio is crisp and clean making for easy listening in a high noise environment. I especially enjoyed Brown's geographical description of Taiwan, and warfare between China and Taiwan. However, landing a modified B-52 in Taiwan where they did...naw. Anyway, 6 hours.2 von 2 Kunden fanden die folgende Rezension hilfreich. Brown's Alternate Reality Von John Campbell An Air Force fantasy, Fatal Terrain projects a world that has no relation to the real one. A private company wages war instead of the military; Hong Kong is in the Formosa Strait, and an aging B-52 is the answer to every tactical and strategic situation. Brown also mentions a massive invasion of Taiwan in 1955 by China which never happened in this universe, but evidently happened in his alternate universe. This novel was educational. For example, I did not know that the U.S. Air Force was populated exclusively by brave, loyal, daring, intelligent personnel, while the Navy had only morons. That the Republicans have only brave, loyal, daring, intelligent people in their ranks, and the Democrats have only morons. That one can change a few pieces of sheet metal on a B-52, which has a radar crosssection the size of Texas, and make it into a stealth bomber. Gee, I wonder why the Pentagon designed the real stealth bomber, the B-2, from the ground up with a totally different shape than a B-52. I'd say the characters are wooden, but wood has some depth. I also didn't know that anyone would strap a man who's just had a heart attack into the pilot's seat of a bomber and go into combat. At the end our heroes actually drive off into the sunset. I have a great opening line for Dale Brown's next novel: "It was a dark and stormy night." Brown should be embarrassed by this novel. I'm embarrassed to say that I finished it.0 von 0 Kunden fanden die folgende Rezension hilfreich. PREPARE TO GO BEYOND BALLISTIC! Von Forbes warren@btinternet.com A blast! China tries to retake Taiwan and islands in the Formosa Strait (five miles south of Hong Kong? That was an absolute howler of a geographical goof. Hong Kong is at least 200 miles south of the Formosa Strait! But don't let this detract you from a brilliant story!) using an assortment of tactical nukes, fighter squadrons and Marine units. Muck and Brad Elliot defy orders (Admiral Balboa should have been on the USS Independence when it got nuked in the story! Ha ha) and fly the Megafortress EB-52 into China to avert WW3. But the Chinese have a few tricks up their sleeve . . . the EB-52 accidentally sinks a passenger ferry as the radar signature is altered and is ordered back to Guam so the bureaucrats from the White House can put them on trial. The Independence is nuked, and the Chinese cleverly blame America for starting the conflict. ICBMs are fired and obliterate Guam in a total orgy of destruction, and 'Muck', Wendy McLanahan, Brad Elliot and all the old fav! ourites head for a secret airstrip in Taiwan - in a CAVE? An inspired idea actually! Meanwhile, in the Persian Gulf, a US sub is caught in a KEVLAR NET?! Wow! A feasible idea inspired by a similar weapon in Craig Thomas's SEA LEOPARD. The Iranians create a diversion for US forces, but at the end of the day, it's up to the Megafortress to stop the Chinese nuclear menace and prevent an apocalypse. Altogether, a riveting, action-packed adventure that is damn hard to beat indeed! A message to those who called it 'unrealistic' - wake up. This is fiction. And a message to Hollywood - stop making awful, putrid romantic comedies and film some Dale Brown books! Dale Brown has done it again; written a novel which does not rely too heavily on technical details, which contains larger-than-life characters from previous novels - this is great, however! Why should fictional characters obey orders all the time! Brad Elliot rules! The flying and military action scenes are as ever, first rate. Although, with the forthcoming THE TIN MAN, my only criticism is that the McLanahan Timeline may have gone far enough. In my view, Dale Brown might perhaps write a sequel to SILVER TOWER in a similarly space-based vein, or introduce new characters like he did so well in CHAINS OF COMMAND. But read this book, forget the detractors (and the geographical goof) and you're in for a thrill-a-minute. Prepare to go nuclear!

Kurzbeschreibung The Peoples Republic of China has launched a terrifying attack against Taiwan. Cold. Swift. Deadly. The U.S. isn't willing to stand by and watch, but when they come to Taiwan's aid, they're dealt an unexpected blow from Chinese forces. It looks like the U.S. is going down..Until aerial strike warfare expert Patrick McLanahan and genius Jon Masters come to into the picture. Together, they have created a monster - the EB-52 Megafortress. A high-tech display of weaponry, fully equipped with stealth cruise missiles. The most sophisticated bomber the world has ever seen. The unsinkable flying battleship. Now China is on its way to a nuclear high noon. And the Doomsday clock is ticking.
