Yawn!Von SteelStephen King has written some excellent pieces of literature and it would be grossly unfair of me to call them anything less than masterpieces, however he has also written complete trash on occasions, Christine however is somewhere in between, it is not a particularly disturbing book, as one might expect from the horrormeister, nor is it completely without the ability to send a chill down the spine, but it certainly won't make you think twice before

turning on the ignition, if it's thrills you want, and you want to be frightened then don't read this book, try IT, because to be quite frank this book is quite boring, it took me a long while to get into it, and once I did I was not impressed, Stephen King can write far better than this, and I'm sure he will amaze us soon, with a masterpiece of literature. Good but not the best Von Ein Kunde This was one book of King's that I put off reading for a long time because I had heard it was not very good. Well I finally broke down and read it, and while I was not dissapointed I did feel it was not as good as his other works. The story and the plot were great and interesting I especially like the history of the car, but the charactors did not see as fleshed out as much as in his other books.1 von 1 Kunden fanden die folgende Rezension hilfreich. YOU'LL BE AFRAID OF CARS AFTER READING THIS Von Marco Aurelio Once, I picked this book to read and gave up. I was enjoying it but the fact that CHRISTINE is too thick was enough to pick a thinner book. But time passed and I knew I had time to read it. This happened almost three years after the first time I tried it. And I finished it in only one week, which, to my schedule, is something very fast. I like to tell friends that no one can ever be frightened by reading an horror book because your mind expect terrible things to happen even if you don't know about them counciously. But guess what! While I was reading this book, every car that appeared next to me frightened me. It seemed like a big starving dinossaur. Creepy, isn't it? But I convinced myself that this is what happens when you have in your hands a very well-written book. CHRISTINE is a marvelous book. If you're a fan of the horror genre, this book is a must-read.

Kurzbeschreibung Stephen Kings gem of a story (Chicago Tribune) about a child with extraordinary psychic powers who is on the run from the government. A #1 national bestseller. Andy McGee and Vicky Tomlinson participated in a drug experiment run by a veiled government agency known as The Shop. One year later, they marry. Two years later, their little girl, Charlie, sets her teddy bear on fire by simply staring at it. Now that Charlie is eight, she doesnt start fires anymore. Her parents have taught her to control her pyrokinesis, the ability to set anythingtoys, clothes, even people aflame. But The Shop knows about and wants this pigtailed ultimate weapon. Shop agents set out to hunt down Charlie and her father in a ruthless chase that traverses the streets of New York and the backwoods of Vermont. Terrifying and gripping (The Miami Herald) Firestarter is chilling proof that Stephen King is superb (Time).
