Getting rid of corrupt traders.Von Paul KalineThe mostly forgotten planet of Fenris has very peculiar rotation and climate characteristics and its only valuable export is the wax of huge and dangerous sea-monsters. But the wax trade is

controlled by a mob which ruthlessly manipulates the prices in its favor. A young Fenris native just returned from Terra helps the wax-hunters to resist the mob. The author mixes the social and action aspects into a very good adventure-story. Interesting, fast-paced and with a number of surprising twists.

KurzbeschreibungFenris isnt a hell planet, but its nobodys bargain. With 2,000-hour days and an 8,000-hour year, it alternates blazing heat with killing cold. A planet like that tends to breed a special kind of person: tough enough to stay alive and smart enough to make the best of it. When that kind of person discovers hes being cheated of wealth hes risked his life for, that kind of planet is ripe for revolution...KurzbeschreibungFenris isnt a hell planet, but its nobodys bargain.
