So when Lieutenant Tabitha Chapel reports for duty at the Naval Special Warfare Center in Coronado, California, Commander Marc Miller is not

just unhappy. He is irate. Marc cannot understand what strings Tabitha pulled to get her the assignment of potentially being the first female SEAL. However, Marc plans to insure that her personal goal is not achieved under his watch. Marc tries to force her out of his command using two fronts. He cuts no slack, expecting her to work at the same competency level as the guys and he works her reassignment through the chain-of-command. However, he finds Tabitha exceeding the standards and her powerful connections reject his efforts to move her elsewhere. As he begins to admire her tenacity and effort, he reassesses his original position on women in the SEALs. He also finds himself falling in love with his subordinate, a feeling that Tabitha shares with her superior officer. Life has become extremely complex as they want each other, but his position will not allow a relationship, nor will her goal. Rogenna Brewer writes a fabulous military romance that will garner the author many accolades from sub-genre fans. The exciting story line demonstrates that if someone wants something strongly enough, they will move the planet without a lever to achieve it. However, SEAL IT WITH A KISS is clearly a character-driven tale as the tug of war between tradition and the breaking down of artificial barriers are seen through the eyes, hearts, and minds of the lead protagonists. The "In Uniform" series constantly keeps the bar of excellence at a very high level and this novel attains that lofty monthly achievement. Once I started reading it I couldn't stop until I had finished it. I really enjoy reading about Seal teams or other special elite teams. This book hooks you the minute you start reading it and won't let go until you finish it. I love it when the main characters have conflicts between them that they have to work out, it makes the story more believable. Tabitha and Marc start out with a major conflict as well as being attracted to each other. Rogenna has a way of tying everything and everybody together with a smooth way that makes everything just seem to flow like it should. I love to read a book that keeps your interest from start to finish, so you can't stop until you get done. I can't wait for her next book to come out. The information she uses about the seal's and seal training agrees with other books I've read or movies I've seen. Rogenna keep them coming and keep up the good work. Von Ein Kunde After reading romance novels for the past 25 years, there have been many, many that I have enjoyed; but none has totally bowled me over like this book!! The characterizations are 3-dimensional; the dialogue is crisp; and the description is fascinating and never boring. As an Air Force daughter for 23 years and an Army wife for 36 years, I naturally enjoy books with a military background and could easily follow this book with its Navy terminology, policies, and procedures. This book was like a living entity that I could not put down and which has stayed with me for weeks. This is the first book that I have ever contemplated reading all over again! Towards the end, I kept saying to myself, "how is this book going to end happily-ever-after and still keep Marc's and Tabby's integrity intact?" Well, read the book; and you'll find out! Cannot wait for the next Rogenna Brewer book, and that's the best review of all!!
